

David Wasylciw

MLA for RANGE LAKE

Dear Resident – Election Day is Monday and I hope I've earned your trust and vote. If elected, I will take the excitement and energy I have for the community and bring it to the Legislative Assembly. I stand for a more open and transparent Government that takes action rather than just talking about it.

Have your say and make sure you vote on Monday. Voting is open from 9am – 8pm at Range Lake School.

If you have any questions or need any assistance getting out to vote please feel free to call me at 446-3059.

Sincerely,

David Wasylciw

David Wasylciw

Let's Do Better at Representing Range Lake

- Keep regular open office hours for drop in visits
- Use the internet and social media to keep in touch with constituents
- Set specific response times to dealing with your issues and concerns
- Creating a Range Lake Day in the Legislative Assembly so I can update all members on what matters to Range Lake
- Hold regular townhall meetings and have an annual visit to each house in the riding

Let's Do Better at Taking Control and Planning For Our Future

- We need to develop a "made in the north" solution for devolution and not just take what's offered
- Be responsible and take control of our debt ceiling so that we are able to build the NWT
- Show leadership and make sure we ask for specific fixes to our regulatory process
- Plan for industrial development and develop sustainable, long-term jobs

Let's Do Better at Being a Modern, Responsible Government

- Examine ways to modernize consensus government to be more responsive and reflect our changing needs
- Introduce recall legislation so MLAs are always accountable – not just every 4 years
- Make appointments based on merit so they are open and transparent
- Improve Access to Information legislation so it covers all areas and levels of Government
- Develop service standards and performance measures for all public programs and services

Let's Do Better at Preserving our Land

- End our dependence on diesel power by extending the hydro grid to cover more of our communities
- Ensure that our industrial growth is balanced with conserving our wildlife and environment
- Modernize building practices to take advantage of more efficient heating and energy distribution

Let's do better!
